

Techniques in Olympiad Inequalities

Masum Billal

Samin Riasat

August 13, 2020

Preface

Contents

1	Basics	1
1.1	Introduction	1
1.2	Power Mean Inequality	1
1.3	Cauchy-Schwarz Inequality	1
1.4	Rearrangement and Chebyshev Inequality	1
1.5	Majorization, Karamata and Jensen's Inequality	1
2	The Buffalo Way	3
3	Substitutions	5
4	Homogenization and Normalization	7
5	Engel Form of Cauchy-Schwarz	9
6	Reverse Rearrangement Inequality	11
7	Squares Analysis Method	13
8	The UVW Method	15
9	Mixing Variables Technique	17
10	Schur-Vornicu-Mildorf Inequality	19
11	Dumbassing	21
12	The Equal Variable Method	23
13	Problems	25
14	Exercises	27

Chapter 1

Basics

1.1 Introduction

1.2 Power Mean Inequality

1.3 Cauchy-Schwarz Inequality

1.4 Rearrangement and Chebyshev Inequality

1.5 Majorization, Karamata and Jensen's Inequality

Chapter 2

The Buffalo Way

Chapter 3

Substitutions

Chapter 4

Homogenization and Normalization

Chapter 5

Engel Form of Cauchy-Schwarz

Chapter 6

Reverse Rearrangement Inequality

Chapter 7

Squares Analysis Method

Chapter 8

The UVW Method

Chapter 9

Mixing Variables Technique

Chapter 10

Schur-Vornicu-Mildorf Inequality

Chapter 11

Dumbassing

Chapter 12

The Equal Variable Method

Chapter 13

Problems

Chapter 14

Exercises
